

How to protect yourself from burglars: By Erica Jermanus

In this short book, I would like to talk about how you can protect yourself, your home, and your belongings from burglars. There are people that will try to break into your home or business or car and steal what belongs to you. These people are on assignment from the enemy to steal, kill, and destroy. John 10:10 But you can keep yourself, family, home, and car safe by following these simple steps.

The first step to protecting what belongs to you is to pray for God to protect you and what belongs to you. You can pray for protection over your belongings, your home, your car, and your family. You can cover everything that belongs to you with the blood of Jesus Christ. You can also pray Psalm 91 over your life, your family, your home, city, state, and country. You can also pray for God to dispatch guardian angels to protect you and shield you from harm and evil. There is nothing more powerful than God and prayer.

James 5:16 says, "...The effectual fervent prayer of a righteous man availeth much." Psalm 121:7-8 says, "The LORD shall preserve thee from all evil: he shall preserve thy soul. The LORD shall preserve thy going out and thy coming in from this time forth, and even for

evermore.” God has protected us from so much that we do not even see or are aware of. He is fighting for us in the spiritual realm. He is working on our behalf and keeping the evil forces of darkness away from us when we pray for His protection over us and our homes and families.

The next step to protecting yourself, your home or your car is to install alarms and security systems. Alarms will go off when there has been a potential break-in and the alarms will alert you and others when someone has broken into your home or your car. It will be loud and will catch your attention when something has happened. Some alarms may alert police to your home when there is a break-in or a car accident. But you may have to pay for those alarm systems, and it may be expensive, but it is worth it if you have the money for it.

The next step to prevent breaks in is to make sure that your car and home doors are locked and secure. Not only your doors, but your windows too. You want to make sure that you do not have any doors or windows that are open unless those rooms are high up and not easily accessed from outside. You also want to make

sure that you lock your home and car doors so that burglars do not have a chance to break in.

In addition, you want to make sure that when you park in either a public place or a place where there is lightning. You do not want to park in a isolated or dark place, especially when you are a female and are alone by yourself. Yes, God can protect you, but we also need to use wisdom when it comes to making certain decisions in our lives. We may need to ask God to give us wisdom and discernment in the world we live in today. We may need to ask Him to lead and guide us as to what we are doing and where we are going. He will have us in the right places at the right times and with the right people if we ask Him.

Also, if you have your car in the driveway at home, you may want to put your porch lights on at night to keep it well lit until day. This can help burglars from staying away from your vehicle. Furthermore, you do not want to leave any valuables in your car for others to see. When you have valuables in your car, such as money, technology, or jewelry, it can lead people to covet those valuables and want to steal them from you. People may see the valuables in your car and open the door when

you are not looking and take them from you. If you have valuables, you want to bring them in your home and put them in a safe place. Also, you do not want to leave lots of money out in the open in your car because that can lead people to break into your vehicle as well.

Another thing that you can do to protect yourself is to watch your surroundings when you are outside in public places. You may also want to pray while you are in public places for God to protect you and your home and car. When you pray, God hears your prayers, and He will answer and come through for you. So, when we pray, we can know that God is protecting us and watching over us. There are so many things that He has protected us from that we do not know about. Jesus Christ has angels warring on our behalf and these angels protect us daily because they have been assigned to our lives. Psalm 91:10-11 says, "There shall no evil befall thee, neither shall any plague come nigh thy dwelling. For he shall give his angels charge over thee, to keep thee in all thy ways."

You can also install cameras around your home and business for protection. If someone comes to your home, the camera will catch them on display. That will

ward off predators from coming to your home to steal things from you. You can also get a pet dog that barks when strangers are at the door or when there is someone in the driveway. The dog will bark and will get your attention if someone is near where you live and will ward off the predators as well. You can also install window bars on your home if you live in an area or neighborhood that may be unsafe. You can also install motion sensor lights. Whenever someone or something is near the light, it will go off, and you will know that something or someone was there.

You can also keep your landscaping tidy by trimming bushes and trees so that you are able to see your car or your home or business. This will also keep predators away. When landscaping is not tidy or clean and the bushes cover up your car or home, it can lead to break ins. You can also get to know the neighbors around you so that the neighbors can keep an eye on you and your home, and they can be on watch if there is something suspicious outside. You also do not want to leave keys hidden outside because a burglar can find it and break into your home. Lastly, you do not want to advertise that you are going on vacation because that can lead to

a burglar breaking into your home or car when you are not home. You can also store your items in a lock box or in a safe place where no one is suspected to look.
